CASE NARRATIVE

Client: Alabama Dept. Environmental Management

Project: ADEM PFC Sampling

Report Number: 280-90509-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

RECEIPT

The samples were received on 11/3/2016 at 8:35 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.9° C.

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): GADSDEN-RAW (280-90509-1). The container labels list "Raw" while the COC lists "GADSDEN-RAW". The sample was logged per the COC.

PERFLUORINATED HYDROCARBONS (PFC)

Samples GADSDEN-RAW (280-90509-1) and GADSDEN-FINISHED (280-90509-2) were analyzed for Perfluorinated Hydrocarbons (PFC) in accordance with SOP DV-LC-0012. The samples were prepared on 11/15/2016 and analyzed on 11/16/2016.

The following samples failed for %Difference in the retention time for 13C4 PFBA (IS): GADSDEN-RAW (280-90509-1), GADSDEN-FINISHED (280-90509-2). The internal standard is a direct match to Perfluorobutyric acid, and the target analyte is shifting in retention time along with the IS; therefore, the data is able to be evaluated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

PERFLUOROOCTANE SULFONAMIDE (FOSA)

Samples GADSDEN-RAW (280-90509-1) and GADSDEN-FINISHED (280-90509-2) were analyzed for Perfluorooctane Sulfonamide (FOSA) in accordance with SOP DV-LC-0012. The samples were prepared on 11/15/2016 and analyzed on 11/16/2016.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
